

electrically height adjustable

head- / foot element manually adjustable or electrically adjustable (optional)

low barred side height by removable clip-on element

SAVI[®]
Reha Solutions

Knut (b) 40-Edition

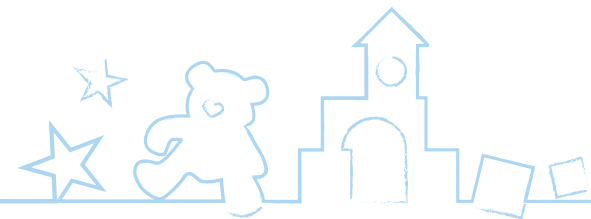

Thanks to the removable clip-on element, we achieve a barred side height of only 40 cm, while at the same time the legal requirements are maintained.

EN 60601-2-52
DIN EN 32623

Medical Devices Act (MPG)
CE-label, declaration of conformity

Trendelenburg-funktion

Why you should choose our Knut (b) 40-Edition:

- therapy bed for kids, young people and small persons
- easy handling of the doors with child-proof lock
- can be combined with all bed frames
- optimum adjustment to correct care height possible, even for tall people
- the wooden surface is treated suitably for children (DIN 71-3 Toy Safety)
- body weights up to 150 kg possible
- extensive accessories
- professional construction style, high stability and reliability
- short delivery time
- humidity protection
- barred side height of 60 cm minimum (DIN/EN-regulation) available!
