

electrically height adjustable

head- / foot element manually adjustable or electrically adjustable (optional)

fixed padding in cream or sky blue

## Tom Paddy-Edition – quick availability in heavenly colour

Thanks to the four-winged folding door and the electrical adjustment of the lying area, the bed offers a very good therapeutic support.

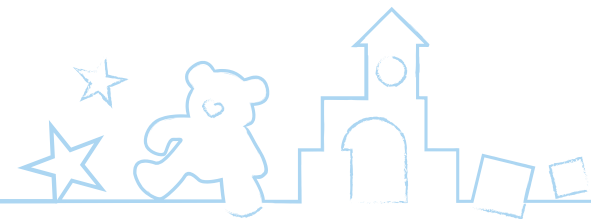

Because of the low entrance height of slightly over 20 cm, even smaller children can get into the bed on their own.

EN 60601-2-52

DIN EN 32623

Medical Devices Act (MPG)

CE-label, declaration of conformity

## Why you should choose our Tom Paddy-Edition:

- therapy bed for kids, young people and small persons
- easy handling of the doors with child-proof lock
- can be combined with all bed frames
- optimum adjustment to correct care height possible, even for tall people
- the wooden surface is treated suitably for children (DIN 71-3 Toy Safety)
- body weights up to 150 kg possible
- extensive accessories
- professional construction style, high stability and reliability
- short delivery time
- humidity protection
- barred side height of 60 cm minimum (DIN/EN-regulation) available!

folding doors completely opened

## Integrated vinyl windows

The integrated vinyl windows fit flush with the fixed padding (wipeable) and have a similar effect as the firmly integrated foam padding does. Furthermore, due to the windows one can have a look from the bed's outside and in the inside. This improves the controlling options and the well-being of the child.

## Tom Paddy-Edition
