

# Vinyl-windows

## The ultimate in safety! - permanently integrated padding & vinyl window

A perfect combination of protection against injury and the freedom to look out of bed.  
Many variations are possible! And the best thing is that you don't compromise on the padding's performance!

The fixed padding is 75 mm thick (see detailed images on the right) and is mounted on a wooden panel, which in turn is securely attached to the bed.

The vinyl window is already integrated into the padding. Height adjustment remains possible, as all dimensions are customised. Unfortunately, this means that retrofitting the fixed padding is not possible.

No risk of injury for your child!

## Optimum protection thanks to fixed Skai-padding

Your child is very active? With the fixed Skai-padding (50 mm thickness), you offer your child optimum protection.

For more information on the different padding options, see page 83 / 84!

Easy to retrofit

This Skai-padding is available in grey!

(other colours on request)

120 cm barred side height

## Optimal view thanks to integrated vinyl windows

The integrated vinyl windows fit flush with the fixed Skai-padding and thus offer a similar padding effect to the permanently integrated foam padding. The windows offer an optimal view. So you keep an eye on your child easily and your child feels visibly more comfortable.
