

Felix

As flexible as Felix – the therapeutic couch without limits

This therapeutic couch offers your child a large therapeutic area and a low entry height. This makes the therapy particularly pleasant for parents, carers and children. It also conceals sufficient storage space for therapy needs and much more.

Its homely design and disinfectability makes Felix thoroughly suitable for everyday use.

Felix (a)

Felix' individual strengths

It is often the small practical aids that decide whether something is good or bad in everyday use. As manufacturers of furniture for rehabilitation purposes, we have incorporated this valuable experience in the design of our new therapeutic bed. The result is a multifunctional couch in a design that appeals to children.

Handy: storage box for utensils like, for example, blankets and preparations

Materials: Powder-coated tubular steel frame, Skai-padded lying surface

height adjustment
68 - 103 cm

Many wood colours possible (see p. 79)

Technical data – Felix (a)

Therapeutic couch | (max. load 140 kg)

Lying area (min. 130 x 100 cm, max. 218 x 100 cm)

Without castors, height adjustment 68 - 103 cm

Castors, height adjustment 75 - 110 cm

Step on the gas and take off – The racing car among Babywalkers

Great for learning to walk! Load, unload, transport! Later, the children can drive each other around in it!

With the Babywalker, your child is always in the lead. The Babywalker helps children discover their world and gives them confidence as they take their first steps. The first steps are an important milestone!

The high-quality Babywalker ensures that your little one takes them safely and without accidents. It accompanies your child every step of the way - both at home and outside.

Flexible use - Babybox/Therapy box

Our therapy box offers parents of children with disabilities a safe and flexible solution for creating a protected environment.

It can be individually adapted to the needs of your child and therefore offers optimum support in everyday care.

The Therapy box consists of:

- A door element with lock
- Seven elements to assemble
- Eight feet to assemble

Technical data

Height of the elements	Width of the elements	Article no.
100 cm	90 cm	100.090.01.07
Type of wood		
Beech wood, pine wood		
Bar spacing		
6 cm		

Adaptable to your home

The size of the Babybox can be easily adapted by adding or removing individual elements. This means you can always create the right space for your child - whether for therapy or for a safe stay in everyday life.

Custom Seating

From the seat mould to the milling block

The simplest method is to scan the seat mould yourself using a 3D scanner app. However, if no 3D scanner app is available, the mould can also be foamed.

The customer's foamed mould (e.g. vacuum impression) can be scanned into our system. The scan file is then used to mill a foam block with millimetre precision.

Advantage of the 3D scanning method:

- Easy handling (dispatch by e-mail)
- No storage costs for models
- Environmentally friendly, as no material waste

Examples:

Full-body reclining shell milled after a 3D scan

The finished mould for the reclining shell

2-piece seat shell milled from a 3D scan

Back and seat element of a 2-part seat shell (finish)

Example of a finished 2-part milling block:

The complete two-part milling block, ready for further processing such as coating, production of the cover or the receiving mould.

Body for an armchair with integrated seat shell

The finished armchair mould with integrated seat shell. The armchair body was assembled from several foam blocks.

Three simple steps to your customised seat shell:

SELF
position

simply
scan it
YOURSELF

WE
mill

Various foam qualities possible:

- pink 4606
- grey 6511
- Frame Foam Ersatz HD anthracite

We will also be happy to send you sample foam blocks free of charge!

Create your own

Create your children's bed for rehabilitation!

This is a list which you can use to create your children's bed for rehabilitations. We will take your wishes into consideration and make an offer about one of our bed's.

Just make a cross and decide how your bed should look like:

1. Lying area of the bed?

- ☐ 65 x 155 cm ☐ 70 x 140 cm ☐ 90 x 170 cm
☐ 90 x 200 cm ☐ 100 x 200 cm other size: _____

2. Which barred side do you need? Height (cm): _____

3. Do you use a patient-lifter? ☐ Yes ☐ No

4. Which lying height (top of slatted base) do you need?

- ☐ 40 cm ☐ 50 cm ☐ 60 cm ☐ 70 cm other height: _____

5. Do you need an electric height adjustment? ☐ Yes ☐ No

6. Which slatted bed base do you need?

- ☐ no adjustment ☐ manual adjustment ☐ step-protection for the bed base
☐ electric adjustment ☐ Trendelenburg-function

7. What kind of doors do you want?

- ☐ 4-winged folding sliding door ☐ 270° door ☐ side rail "hide away" ☐ folding door
☐ lowerable side rail ☐ electric lowerable side rail

8. How many doors do you need?

- ☐ front side ☐ front and back sides ☐ head and footelement

9. Locking mechanism?

- ☐ SAVI-lock I ☐ SAVI-lock II ☐ SAVI-lock III ☐ SAVI-lock IV

10. Do you need perspex?

- ☐ Yes. Where?: _____ ☐ No

11. Kind of wood / wood-colour? Wood:

- Wood-colour: ☐ natural ☐ basalt ☐ wenge ☐ barrique ☐ teak ☐ walnut
☐ white stained ☐ white lacquered

12. Colour feature?

- ☐ natural ☐ yellow ☐ orange ☐ red ☐ grey ☐ blue-purple ☐ purple
☐ blue ☐ green ☐ white ☐ pink ☐ other colour: _____
☐ coloured sticks ☐ children's name: _____

13. Running gear? ☐ castors ☐ without castors

14. Do you want drawer? ☐ Yes ☐ No

15. Do you want a mattress? ☐ Yes ☐ No

If yes, which one?

- ☐ polyfoam mattress ☐ interior spring mattress ☐ cold foam mattress
☐ Reha-Star II ☐ Reha-Star Plus ☐ incontinence cover

16. Do you need a padding? ☐ Yes ☐ No

If yes, which one?

- ☐ loose Skai-padding ☐ fixed Skai-padding ☐ edge-padding ☐ motifpadding MALU
height of the padding: _____ colour of the padding: _____

17. Do you need vinyl windows?

- ☐ Yes. Where? _____ ☐ No

18. Equipment?

- ☐ removable posts (Niklas) ☐ net-roof ☐ raising aid ☐ lockable handset box
☐ tube feed-through (gap) ☐ infusion holder ☐ drawers ☐ mattress holder
☐ touch-protection for height adjustment ☐ foot cut-out (e.g. for patient lift)
☐ central locking device for 4-roller chassis (Knut a+b only) ☐ access aid made of artificial leather
☐ supply opening (hole) with closing mechanism

☐ Please use this statements to create an offer, where you choose a model, which fulfils the handicaps to the greatest possible extent.

☐ Please use this statements to create an offer about a special model to fulfil the handicaps exactly.
